

Laetus Opens Track and Trace Academy in Bensheim Germany.

Track and Trace for anti counterfitting of drugs is creating a huge demand for special resources to handle the FDA mandated serialization of unit of sale packages by 2017. In the meantime many other countries are also actively setting their own requirements adding complexity to world-wide distribution.

Laetus has been heavily involved in Europe over the last 8 years in track and trace for almost all affected countries and is now ramping up its staff in this area to meet the demand.

As a bold move forward, Laetus has built a new Track and Trace Academy in Germany. Dedicated to world-wide requirements, the Academy is open to new employees and customers as well.

With 3 to 5 day courses, topics cover the history, the requirements and implementation needed to meet today's and future world track and trace regulations.

This also includes a completely outfitted serialization line, hands-on training for operation of hardware and software and the ability to test your own samples.

To learn more, feel free to contact us to discuss your own training session or use the following link for more information: <http://www.trackandtrace.academy/>
